

GENERAL BREEDING CONDITIONS

Duplexx – HOLST 276421000098816
Approved Studbooks: **HANN, HOLST**

Breeding Season: 2026

Mare Owner / Breeder Information

Breeder / Owner Name:

Address:

Delivery Address (if different):

Mare Name (as in passport):

UEN (Universal Equine Life Number):

SIRE Number (France):

1. General Provisions

1.1 These conditions apply to the use of semen from the stallion **Duplexx (HOLST 276421000098816)** for the **2026 breeding season**.

1.2 Any order placed with **Stallions.Etalons.Hengste (S.E.H.)**, either via the official website or by means of this breeding certificate, constitutes full acceptance of the present terms and conditions.

1.3 Any order submitted without acceptance of these conditions cannot be processed.

2. Ordering Procedure

2.1 Semen may be ordered:

- a) via the official **S.E.H. website**, or
- b) by submitting this **completed and signed breeding certificate**.

2.2 All orders are subject to **availability and final acceptance by S.E.H.**

3. Mare Identification and Required Documents

3.1 This contract applies to **one specifically designated mare only**.

3.2 The following documents must be provided **prior to any semen shipment**:

- a) Copy of the **identification page of the mare's passport**
- b) Copy of the **UELN page**
- c) Copy of the **owner page**
- d) **SIRE number** (mandatory in France)
- e) **Studbook or breed registration**

3.3 Any change of mare requires **prior written approval from S.E.H.**

3.4 If a mare change is approved, the **same documentation must be provided for the replacement mare**.

4. Breeding Rights

4.1 The breeding fee entitles the mare owner to **a maximum of three (3) inseminations** for the designated mare during the **2026 breeding season only**.

4.2 Unused inseminations **are not transferable to another season** unless prior written approval is granted by **S.E.H.**

5. Breeding Fee and Payment Terms

5.1 Breeding Fee (chilled or frozen semen):

€1,200 excluding VAT (+ applicable VAT)

5.2 Payment structure:

a) **€340 + VAT** payable upon reservation.

b) **€860 + VAT** payable **on 1 October 2026**, if the mare is confirmed in foal.

5.3 Transport costs, handling fees and health documentation are **charged separately and must be paid prior to shipment**.

6. Veterinary Monitoring and Advance Notice

6.1 Due to the strong demand for the stallion **Duplexx**, prior communication is essential.

6.2 As soon as the veterinarian begins monitoring the mare and estimates that ovulation is approaching, the breeder or veterinarian must inform **S.E.H. as early as possible** to allow optimal organisation of semen availability and delivery.

6.3 Late notification may limit delivery possibilities. **S.E.H. cannot be held responsible for consequences resulting from delayed communication.**

7. Delivery and Liability

7.1 No semen will be shipped until **all required payments**, including transport and documentation fees, have been received.

7.2 **Belgium:** weekend deliveries may sometimes be possible depending on the courier.

7.3 **France:** weekend deliveries depend on location and **cannot be guaranteed.**

7.4 Transport costs are **non-refundable and charged per shipment.**

7.5 **S.E.H. cannot be held responsible for transport delays or any resulting veterinary or additional expenses.**

8. Pregnancy Confirmation and Veterinary Certificate

8.1 If the mare is **not confirmed in foal by 1 October 2026**, the breeder must provide a **veterinary certificate confirming the absence of pregnancy.**

8.2 As the breeding fee is payable in two instalments, this certificate is necessary in order to officially confirm the reproductive status of the mare.

8.3 If a veterinary certificate confirming non-pregnancy is not provided, **the full breeding fee may become payable**, including the second instalment, regardless of the actual pregnancy status of the mare.

8.4 This provision is independent of any request for mare substitution or breeding deferral, which remain entirely **at the discretion of S.E.H. and are evaluated separately on a case-by-case basis.**

9. Mare Substitution or Breeding Deferral

9.1 A mare substitution or deferral to the following breeding season may be considered on a **case-by-case basis**, particularly where the mare has been inseminated and circumstances beyond the breeder's control arise.

9.2 This possibility is subject to:

- a) clear and prior communication with **S.E.H.**
- b) submission of all required documentation
- c) provision of a veterinary certificate where applicable

9.3 No substitution or deferral is valid **without written confirmation from S.E.H.**

10. Acceptance

By signing this document, I confirm that I have read and fully accept the present breeding conditions.
